Touch | Keypad Pure-Coffee

Coffee, Hot Water and C-Lever Steam
Touch Screen or Keypad user interface

**NEW
COFFEE
SYSTEM**

*Simplified
Elegance*

The Egro ONE Pure-Coffee combines style with high quality functionality. The futuristic and floating design of the strong front panel represents an ergonomic element of design and gives a unique and inimitable style to the fully-automatic.

up to
250
espressos / hour

up to
180
coffees / hour

Two main versions:

ONE Touch
with a large 5.7" touch display

ONE Keypad
with a traditional keypad.

The ONE Touch has an advanced user interface with a 5.7" touchscreen graphic display in full colour.

The easy-to use user interface guides the barista through the choice of products. The multi-colored page system enables the barista to choose from 48 products, each one with its own attractive user-friendly icon. Restricted access technical menus offer the machine administrator a wide range of additional functions, such as precisely defining the ingredients of each individual drink, creating new drinks, checking machine consumption, running diagnostic checks and regularly cleaning the machine with step-by-step procedures shown on the display.

up to
120
chocolate / hour

POWDER MODULE. The Powder Module allows for the management of a great number of beverages in powder form. It is an external device positioned on the right hand side of the machine and consists of two hoppers that may either be used with one powder or may operate sepa-

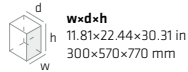

rately with different aromatized, spiced, caramelized, chocolate-based and milk powders. An alternative high-performing solution that is well suited to all those venues wishing to offer their customers an increasingly varied and exhaustive choice of beverages.

NEW COFFEE SYSTEM. The new dispensing spout with a single component is easy to remove and take apart into two pieces for a perfect hygiene. Projected with the use of food safety material particularly resistant to elevated temperatures and made in black coloration, the new brewing spout has high characteristics of longevity, healthfulness and security.

STEAM SOLUTIONS.

iSteam is a completely automatic and patented steam wand that allows to froth the milk at the perfect texture and temperature.

Cool Touch is an innovative steam outlet, heat insulated thanks to a double protective covering, that guarantees the elimination of the risk of burns due to accidental contacts during high working temperatures.

DURA-BREW. The international spirit of Egro ONE is underscored by the enhanced brewing group in stainless steel 18 grams, created for the specific purpose of enabling the preparation of coffee beverages in perfect American and North European style. The brewing unit boasts a revolutionary patented hermetic closing system, which requires less maintenance and reduces the overall running costs of the machine.

ERGONOMIC AND FUNCTIONAL LED LIGHTS.

Brilliant LED lights illuminate the drink preparation area. A specific operation is associated to every colorings: lights shine blue when the machine is ready, white when its brewing, red when its rin-sing and green when an action is required during cleaning.
