Comfort and professionalism

Ergonomics and essentiality, versatility and ease of use: this is the Quick-Milk NMS model of Egro ZERO. A compact super-automatic, especially designed for locations with medium-low daily consumption, which still want to offer their customers professional-quality espresso-based products. It optimises the use of the space available, according elegance and ease of use.

24h recommended daily output*
100 cups

1h maximum hourly output
180 espressos
130 caffè lungo
140 cappuccinos
100 latte macchiato

Versatile and multifunctional, Egro ZERO allows up to 17 different beverages to be programmed, and ensures that every cup is of the highest quality.

Egro ZERO is equipped with an intuitive user interface. The backlit keypad can be activated by a simple touch. The button identifying the chosen product flashes during the entire brewing process – an attractive but also functional detail.

Egro ZERO has a highly professional milk system, allowing the user to brew a cappuccino or latte with a soft, dense crema. In the Quick-Milk NMS version, the super-automatic can be fitted with the innovative Cool Box 6.5, an attractive, ergonomic cooling unit with a capacity of over 6 litres.

Egro ZERO has a dispensing spout with one of the largest movement ranges on the market, making this super-automatic suitable for the preparation of milk-based beverages in glasses up to 18 cm high, while at the same time ensuring perfect centring in the classic espresso cup.

Egro ZERO is particularly suited to self-service applications, thanks to its simplicity and its working area illuminated by LED lights, which ensure greater comfort and ease of use. If this option is chosen, the machine will be delivered complete with a special locking kit, to ensure secure use.

1h maximum hourly output
100 chocolate

POWDER HOPPERS. In its most complete configuration, with an in-built beverage powder option, Egro ZERO allows you to quickly prepare all kinds of chocolate beverages – hot milk chocolate, fondant chocolate, white, spiced and caramel chocolate – to flexibly accommodate even the most demanding of palates. The powder hoppers are made of an innovative technopolymer in black-fumè transparent colour particularly suitable for applications involving contact with foodstuffs.

(*) average value that guarantees the best ownership cost of the coffee machine

Dimensions (W×D×H)	Voltage - Frequency	Power	Weight
9×18.1×13.5 in 230×460×340 mm	230 V - 50/60 Hz 120V - 60 Hz	0.10 Kw	30.13 lb 14 Kg

NEW MILK SYSTEM. The new milk system consists in a series of components offering the user a technological package that has been entirely reviewed to make it more ergonomic and practical. The dispenser spout has a single head that performs all dispensing functions with high-performing efficiency (2 coffee outlets, 2 milk outlets, 1 water outlet and 1 outlet for powder products). Projected with the use of food safety material particularly resistant to elevated temperatures, the new brewing spout has high characteristics of longevity, healthfulness and security.

QUICK-MILK FRIDGE. A real refrigerating unit with smaller dimensions and with great aesthetics impact. Its housing is made from lightweight yet hardwearing materials; the stainless steel door has a brushed finish and its storage capacity is equivalent to 4 liters, making the Quick Milk Fridge the most satisfactory solution for storing and dispensing milk in an extremely practical manner.

COOL BOX 6.5 is a practical and quality solution for storing and dispensing milk. The modern door handle improves the ergonomics of the product. Equipped with an internal light, Cool Box 6.5 guarantees an excellent visibility to the user.

DURA-BREW. Egro ZERO is characterised by precise, reliable, innovative brewing technology. The patented brewing group, in stainless steel, displays a revolutionary hermetic closing system, which requires less maintenance and reduces the overall operating costs of the machine.
